Good day to all; I am writing to inform others how Manitoba Hydro is not living up to their promises. I imploring this CEC should be stopped. Manitoban's are not giving a chance to voice their concerns especially the northern communities that didn't benefit from these hydro's projects.

RE: Reprisals for Requesting for Accountability and Transparency

I'm submitting my letter to request a forensic audit to be done with Tataskweyak Cree Nation. I continuously requested this to TCN former leaders and now this current chief Michael Garson. I have worked for transparency and accountability since year 2000 and I don't have much faith with AANC at Winnipeg office. They always made me feel my fears are unfounded and they don't need to look into the affairs of other financial matters especially Manitoba Hydro's. This is provincial matter and why are they interfering Federal First Nations, maybe they get the share of the pot and don't say nothing. Basically why AANC is there, just a front, nothing is done by this organization.

Now, I've been forced to leave my community fearing for my safety. I have grave concerns regarding the TCN's head constables to protect my safety. There are numerous complaints how these constables are abusing their authority and practically misusing the constable's vehicle to go to a nearest town to buy drugs and alcohol or reselling the confiscated alcohol. I had questioned their activities & now people are calling me also fearing of reprisals for speaking out. Teachers and nurses that are desperately needed and now they are leaving the community also fearing for their safety. Just recently, a complaint was made to the RCMP how they are threatening the staff and other member for speaking out and this lady was told he would kill her if people weren't around to witness. These kinds of actions are not tolerated by any person.

I met with former AANC Minister with the private investigator's report to clearly show we are in need of transparency and accountability in all First Nations leaders throughout Canada. This private investigator was bullied and threaten as I was when we were inquiring why Manitoba Hydro's millions of dollars that are missing. We clearly see corruption and how the consultants are made to be extremely wealthy. We contacted the RCMP in Thompson MB and it was mentioned there is money laundering. Then to make matters worse, I have been thrown at with Hydro's agreements to sign under duress or TCN will not get any money if I don't sign the documents. TCN lawyer Douglas McKenzie has been instructed not to contact me before I became a councillor and he knows he was involved with the former chief's removal due to him questioning their activities. TCN has 44 accounts, why? No wonder we can't get anywhere, now I'm being ousted out with intimidations, threats and bullied for speaking out against this Keeyask's negotiations. **Now my payroll has been stopped with no written letter to explain their actions.** I cannot attend no hydro meetings or to be given any financial information for fear of showing to TCN members. I got in as Councillor to protect the rights of my members and I will not stand by allowing hydro to ruin our community with their lies or having our leaders to sign contracts under duress.

Where does this organization step in to force Accountability and Transparency to all First Nation leaders' right across Canada? No person should get attacked or verbally, threaten, bullied for trying to help their members. I am standing for those who can't speak and I refused to be intimidated by MB Hydro's tactics to get leaders to sign agreements. No money they say if we don't sign but we don't get no money to build houses, businesses or other crucial matters, example; water & sewage and water treatment center to accommodate all TCN homes. What happened to the money? Why isn't AANC turning a blind eye to this matter, I'm sure other communities are also under duress from corrupt leaders.

I want an explanation why my payroll has been denied and my right as councillor has been attacked due to me speaking out. I am distressed and very cautious of how hydro displayed their honesty and integrity; they don't have any honesty, Period!!

Thank you and I am hoping AANC at Ottawa will help with this crucial matter.

Re: Keeyask Dam Bipole III, and Canowapa, Manitoba Hydro's projects

Tansi Mr. Sargeant;

My name is Solange Garson from Split Lake, also known as Tataskweyak Cree Nation. I've been very outspoken on these Keeyask Negotiations from as early year 2000. I had no knowledge of hydro negotiations till I moved back in year 1999, than hearing the disgusting stories how these consultants and lawyers have been taking advantage of their position to have hydro projects to be pushed on our community. These same people have businesses of their own, possibly hiding behind TCN not to pay taxes.

I was stunned when I returned home; I remembered how TCN was with six beautiful beaches, clear water and fish that were edible. Now, ugly, jagged rocks hydro had dumped on the shore lines, water is murky brown, with manure & dead logs (from the erosion from fluctuating water level), and fish are likely with high level of mercury and some are rotten with sickness, animals that are sick from the Kelsey, Limestone and other hydro dams that are dumped with toxic chemicals by covering the lagoons with dirt. They don't follow the guidelines to keep the environment clean but cutting corners to cut waste of money.

My dad, Johnny Garson, worked all his life as a CNR labour and he was also a trapper by trade. We moved back to TCN in the early 70's and I noticed the changes with surrounding environment, our members and our culture way of life slowly but dramatically destroying our dignity. I saw my dad's eyes slowly fading from the hurt he couldn't provide for us; we lived on Hudson Bay's groceries. This was a double whammy for my parents, first the government came along took the children away; he couldn't pass on his knowledge to his son's. I'm the third youngest and I know for fact I was hidden from the "**Indian Agents**" not to be taken away. My older siblings were taken, one is still missing and we have no knowledge if he's alive. Now, TCN members are being ripped apart again from hydro's "**Indian Agents/Hobb's & Associates, Robert Roddick and Douglas McKenzie (TCN Lawyer)**".

I had no knowledge what was happening to our community. Then I went home year 1999, I was so shocked to see the devastating effect it had on our community; men were slowly drifting away from our cultural ways; nothing was passed on, hydro's lawyers & consultant's busy having our former leaders being wine and dined to sign agreements or paying themselves extremely well and leaving the bill on TCN's expense. I saw many of our elders succumb to the life style these outsiders provided with alcohol and drugs; we buried more of our members than we put them to work.

Hydro promised jobs and prosperity. Now, I'm hearing these contractors (Britco, BC owners, which received \$207 million for the Keeyask Dam) are not giving any jobs to the First Nations, they get laid off for months on end, no training is provided or they take the training dollars away from the community.

All this is done at Hydro office in their “Clean Renewable Energy” at Winnipeg. We are not part of any partnership, then we should rip up their Agreements or don’t build the dam in our land, don’t matter if its crown land, still ours.

This **Clean Environment Commission Hearings** is being dictated by these consultants and MB Hydro employees; they say they speak for the Trappers, fisherman and our members when actual fact, we can’t speak at these Hearings. They don’t want the public to know the truth the damage is being done to the environment, devastating our way of life. No amount of money can replace what was done to the northern Manitoba (irreversible and impacted our way of life along with the animals and water life). I don’t need to be a trapper, environmentalists or brain scientist to know what’s happening to the land. We don’t need outsiders to come to decide our future while they are getting extremely rich with their lies. Other communities (Easterville, Moose Lake, Grand Rapids, Fox Lake, Nelson House and South Indian Lake) had suffered most when hydro bulldozed their resident’s home or forced them to leave their homes when they hired these “Indian Agents” to force the leaders or bribe them to sign off their lands.

This is back in the early 60’s when First Nations were treated as insignificance with no regards of lives that were being impacted by hydro’s “Clean Renewable Energy” Dams. **NFA; Schedule E: “joint action program for the eradication of mass poverty and unemployment”**. Well, this is year 2013, still no jobs, maybe cleaning up after them but no training, nothing!! Now, we have **more** mass poverty and no jobs for our members; the dams clearly damaged the environment. I will not apologize for my letter; we are not being treated fairly along with other Manitoban’s. This is our lives and our land to protect, not too be extinguished by hydro and others that lied to the public and wasting the tax payer’s money to gain personal wealth. This is serious and millions of dollars are unaccounted and mysteriously disappeared. Possibly money laundering and no honesty or integrity is being displayed by MB Hydro and consultants. We asked for Forensic Audit; then I was ousted out or was treated like an outsider immediately. Does it pay to be honest? I would believe so?

Thank you for taking the time to read my letter of why CEC Hearings should be stopped until this matter is resolved by the RCMP to find where hundreds of millions disappeared. I do apologize if my English is not eloquent but as long my views on this is out along with those who can’t speak.

Open Letter to all TCN Members

Tansi Chief and Council;

I am so very disappointed how we became as a team; I was very excited thinking this corruption would be stopped and hold those responsible for their actions. I know I'm not perfect but I cannot continue on this masquerade having our TCN Members think everything is ok when in fact it isn't going the way it should for this "Keeyask" Manitoba Hydro's project. I am not going to resign until the Forensic Audit is done; I am appalled how Ernie Hobb's, Douglas McKenzie, Robert Roddick continues to this day to hang on to our finances. Reason why hundreds of millions went missing and we are not doing anything to hold them responsible. How can you pretend nothing is happening when in fact MB Hydro will take the Partnership away if we don't pay our end? How can we? When these consultants, lawyer, and others had squandered our "Partnership money" and no one is being held responsible.

Here are the lists of reasons why we should have this Forensic Audit done:

- Water & Sewage that wasn't completed, yet huge amount was put into this project from Federal and MB Hydro.
- Keeyask Center that wasn't build, yet money was deposited into this project, 4 million plus \$750 thousand in 2011, and again 2012, for operations that's not even there.
- Grant Thorton, our Auditor, says huge amount is missing and he doesn't get all financials reports, so how the audits are passed each year?
- Numerous others concerns where this Private Investigator uncovered hundreds of millions being transferred around.

I can list all the corruptions but I will be writing a book; **this has to stop**, Chief and we cannot allow this to continue. I am not doing anything wrong and I wouldn't rest until this Forensic Audit is done. I will resign as soon as this done and all the finances never to be turned over Ernie Hobb's and Associations, Robert Roddick, Tanis Olafson or Campbell and Marr (Douglas McKenzie) ever again. I will not apologize for my actions, I am not doing anything wrong, once this is cleared, and then maybe we can have a chance to better our community.

Ekosi

RE: OPEN LETTER TO TATASKWEYAK CREE MEMBERS

I know you recently just came on as a CEO for Manitoba Hydro and I'm sure you are aware of my actions to get the true financial records to find out exactly where hundreds of millions of dollars went or how much was spent on these hydro projects. I have read your eloquent words of how much you admire MB Hydro low rates; this only shows how little you know the true picture how MB Hydro are dishonest to the "Aboriginals, First Nations, or Natives" or however we are being called. I have been asking these questions since 1999 and still nothing is given. You know why Scott? Manitoba Hydro lied to the Public Utility Board to raise the hydro rates to cover up the mess you are left to clean up.

Now, I understand you had signed the Confidential Agreement, I wonder if you would allow this huge mismanagement of hydro's to be kept secret? You are left with a big mess and why should we sign anything that would ruin us forever? There is nothing to this meaning "Clean Renewable Energy" when they destroyed the land forever. Only Clean Renewable Energy is the building they build on Portage Avenue. I refused to sign any agreements without consulting a lawyer, TCN lawyer is not allowed to speak to me. Why should I sign Conawapa or Bipole III if we weren't consulted; tossing us agreements to sign, bullying those who don't sign or making threats we wouldn't get no money; well, what happened to the millions that was spent? Nothing is done in our community, maybe a few things from all those years we were promised (1977).

I understand the consultants, Lawyers and others are being paid by hydro's money that was given to us; this is where I find very hard to believe Manitoba Hydro will be honest with us. They never did and I will not stop fighting until we have answers to find out where all that hundreds of millions went missing. This is MB Hydro's code of ethics and I wonder where they lost the meaning.

"Manitoba Hydro's activities will be conducted in a lawful, responsible and ethical manner so that our reputation for honesty, integrity and the faithful performance of our undertakings and obligations are maintained and enhanced".

What happened to the consultant that spoke out against hydro; they quickly fired her for defending Manitoban's hydro's rates. They discredit her and tried to smear her how she was a "nobody" consultant, when actually fact she is a Theoretical Physicists and very smart woman.

So, the question is, why should we sign a Confidential Agreement if these Agreements are not to benefit our community. You came to our community and saw nothing was done. You are aware of this and yet you continue to praise Hydro's mess? You will inherit MB Hydro's biggest financial disaster they made and I will sue them for lying to everything that was written on those Agreements. Nothing is complex but those who make it complex for us to not to understand. We are not stupid and I shall sue the lawyers, consultants and especially MB Hydro's mess.

We will not take this lightly anymore and we will not have hydro, consultants or lawyers bully us no more!! No more lies!! I will not apologize for lack of writing eloquent letters; it's straight to the point with no hidden words.

Ekosi;

Mr. Dave Chomiak
Minister Responsible
Of Manitoba Hydro
Legislative Building
Winnipeg MB Canada
R3C 0V8

Dear Mr. Chomiak;

As a Councillor responsible for Tataskweyak Cree Nation, the recent email I sent to you regarding a financial audit at TCN was **not** spent appropriately, and is **not** accounted properly. The expectations of (some) TCN Chief and Council are **not** in the best position to determine whether the management of TCN's fund is appropriate, and whether an audit is required. This is where Manitoba Hydro controls TCN Leaders to sign the Confidential Agreement or contracts which are not the best interest for our community or protecting our Treaty Rights.

I am requesting a forensic audit investigation to be done. I'm very concern where I have seen maybe a sliver of promises that were kept by hydro or consultants and lawyers paying themselves vast amount of reimbursement's claims for work they didn't do. Maybe few "Aboriginals" are working for Keeyask and most are not trained; those who weren't trained are hauling rocks or having low maintenance work to keep MH's employees clean. Contractors that were hired also receiving millions of dollars to train but no one is being trained. I had seen and heard this from TCN workers. This includes Wuskatim. **These are not allegations**; this is the truth.

Yet, this Minister says he understands that MH and TCN's Chief and Council are working together to implement the Joint Keeyask Development and it was ratified by TCN Members through a ratification vote, which was supported by a majority vote. The votes were 1/3 of TCN's band meeting but we have over 3000 TCN Members and he calls this a majority. This Minister believes this acceptable when TCN Members has not seen the results of the ratification votes especially this involves future TCN's children. Coincidentally; Chomiak made the same remark "*we will be sabotaging our children's future by not investing today in hydro*". Yet he notes on his letter that "*I have a voice in the decision making process, and the ability to influence TCN's response to the concerns about Manitoba overall financial management*" when in fact, a former chief

had tried to stop these ridiculous reimbursements claims by consultant (Hobbs), then to make matters worse; our TCN Lawyer prepared a BCR to oust this chief by stripping his title when he tried to keep accountability within TCN Band. I would like to quote Ron Schuler's in the Standing Committee Meeting on April 9, 2013 "*this is a very important accountability mechanism for the committee and those individuals who sent all of us here.*"

I believe Keeyask negotiations was set up to fail TCN members and stripped of our Treaty Rights by these discreditable lawyers from Hydro. I see how these outsiders manipulated our elders to come to meetings in Winnipeg for *hypothetically* hydro meetings but when in fact they are sitting at Hobb's office doing absolutely nothing.

These selected TCN Elders get paid for travel almost \$30-50 thousand a week on bogus meetings with Hydro; then Hobb's charge TCN for attending their office; wouldn't this be called double dipping? Hobb's and Associates are known to plagiarize their report also they would have door prizes with brand new fridges, flat screen TV's, camcorders, or other large door prizes to make statistics. Some questionnaires that were done by the consultants were offered to pay TCN \$15.00. I had heard many TCN members that didn't understand the questionnaires but they answered for the money. *Nothing was done in Good Faith.* These consultants, lawyers or other non-members weren't not capacity building; most were developing their own companies on ratepayers money. I want a **Forensic Audit** done on this Keeyask Negotiations. I'm hearing there's a private jet that was purchased by a consultant, a Quebec Rail line that was almost purchased, other companies that are hidden behind TCN's Corporation to evade paying taxes.

Mr. Chomiak, the Keeyask Center is not there!! (\$4.million plus another \$750.thousand) And the money is spent; this is kept from me; even before I was a councillor; now I'm not in the picture because I'm asking too many questions. Many other projects did not go through due to mismanage by the consultants (resort, recreation center and water/sewage) countless other projects that failed due to lack of accountability. I know Chomiak will say this is the Chief and Councils responsibility to allocate money but as a shareholder in any business; they would ask to be consulted exactly where the money is spent. I would want to know exactly how every penny was spent and to be explained. Isn't this a good business practice?

TCN's Auditor Grant Thorton indicated there is fraud or errors due to lack of transparencies from these consultants; they don't have the correct information to connect the dots. How did Hydro pass their audits when hundreds of millions missing? How can the Provincial Auditor pass the books when we can't even balance our own? Possibility there may two set of books of financial records that are hidden. Is this Accountability Mr. Chomiak?

Chemawawin or Easterville, Moose Lake and others had Hobbs & Associates controlling their money; of course money went missing and hydro went along with this just as long the consultants stripped them of their Treaty Rights. As for Trust Funds; Hydro has to approve the Trust Money; we must have this approval from Manitoba Hydro, Federal, and Canada if we can use our Trust Fund. This is why I am asking for a Forensic Audit; also to be done by an independent Forensic Auditor. This is for the future generation of TCN children.

This is **not** a “**Clean Renewable Energy**” it’s destroying plants, wildlife and everything in the water dying with the pollution that is created by the dams; this is not clean renewable energy. I see this every day of my life and 95.9 TCN members would agree, **not 1/3!!**

I may not be eloquent writer but I can write plain English for all TCN Members to read; everything that was done by hydro or consultants were deliberately made to be complex due to hiding the true financial picture. Cleverly done but no more; I want a Forensic Audit done to find where half a billion dollars that was to be infrastructures, jobs or business’s, don’t see any capacity building.

Councillor Solange Garson
